1500v grid-connected inverter

Overview

What is a 1500 VDC inverter?

This 1,500 Vdc inverter series has been designed to comply with the most demanding grid connection requirements in the world. They feature then a low voltage ride-through capability, they can control the active power delivered to the grid and they can also deliver reactive power.

What is a 1500 watt power inverter?

Power inverters allow you to convert Direct Current (DC) from batteries to Alternating Current (AC) used by devices and appliances. A typical inverter on the market is the 1500 Watt Power Inverter. You have many models to sort through if you're in the market for a 1500W Inverter.

What is a XGI 1500 inverter?

The XGI 1500 inverters are the most powerful 1500VDC string inverters in the PV market and have been engineered for both distributed and centralized system architecture. Designed and engineered in Lawrence, MA, the new SOLECTRIA XGI inverters are assembled and tested at Yaskawa America's facilities in Buffalo Grove, IL.

What are grid-connected inverters?

Grid-connected inverters (GCI) are used to feed power from renewable energy distributed generators into the grid*. They are widely used for this purpose. Repetitive control (RC) enables such inverters to inject high quality fundamental-frequency sinusoidal currents into the grid.

Are Yaskawa Solectria solar XGI 1500 string inverters reliable?

Yaskawa Solectria Solar's XGI 1500 utility-scale string inverters are designed for high reliability and built of the highest quality components that were selected, tested and proven to last beyond their warranty. The XGI 1500 inverters provide advanced grid-support functionality and meet the latest IEEE

1547 and UL 1741 standards for safety.
