

SolarMax Energy Systems

200kw photovoltaic AC combiner box quotation

Test certification
CE  FC 

Overview

What is a PV AC combiner box?

The new PV AC Combiner boxes have been designed for PV systems with string inverters in trackers or fix tilt systems. The product portfolio is suitable for inverters from 60 kW up to 200 kW and support voltages of 400 V, 690 V or 800 V AC. The combiner boxes allow to collect from 2 up to 6 string inverters in one single cabinet.

Why should you choose AC combiner box for solar power generation?

In addition, better maintenance and reliability of the PV power generation system. The AC combiner box able to increase more efficiency and safety of the Solar power generation system. Firstly, all indoor panels have protected with IP54 or better even more all outdoor panels have protected with IP65 or better.

What are the different types of ACDB Solar junction box?

Manufacturer of a wide range of products which include acdb solar junction box, solar no volt relay (solar nvr), solar ac combiner box 200 kw (2 in 1 out) with no volt relay, solar ac combiner box, solar acdb 45-60 kw with no volt relay, ac spd, ryb indicator and solar ac combiner box 150 kw with nvr, ac spd, ryb lamp.

Can a solar AC combiner support string inverter output aggregation?

Individual fused inputs facilitate string inverter output aggregation. Solar AC Combiners support all string inverters and are highly configurable to fit any application. Using in Dairy, Plastic industry, Refrigeration plants, Batching plants, Chemical Plants, and many more related to electricity.

Can a string inverter be isolated from a PV system?

Furthermore, each string inverter can be easily isolated from the system to do maintenance tasks. The new PV AC Combiner boxes have been designed for

PV systems with string inverters in trackers or fix tilt systems. The product portfolio is suitable for inverters from 60 kW up to 200 kW and support voltages of 400 V, 690 V or 800 V AC.

How many string inverters can a combiner box collect?

The combiner boxes allow to collect from 2 up to 6 string inverters in one single cabinet. They withstand ambient temperatures from -20 up to +50°C to operate in hardest climate conditions, fulfilling the highest market standards as per IEC 61439-2 ed 3.0:2020.
