

LiFePO4
12.5V-15.0Ah

CAUTION!
Do Not Short Circuit
Do Not Crush
Do Not Incinerate or Heat
Do Not Disassemble
Store in Dry, Cool, Ventilated
Environment
Keep away from children

100% Recyclable
Made in China

Overview

What is a 28 volt lithium ion battery pack?

28-volt Lithium-Ion battery packs power the entire Milwaukee M28 System of power tools. The V28 Lithium-Ion battery pack offers up to twice the run-time of an 18-volt NiCd or NiMH pack and is actually lighter than 18-volt NiCd and NiMH packs! Lithium-Ion technology allows consistent fade-free power meaning the first cut is as powerful as the last.

What is a M28 lithium-ion battery pack?

The M28™ Lithium-Ion Battery Pack is built to handle high-torque applications on the jobsite with ease. Managed by Milwaukee's exclusive REDLINK™ Intelligence, the battery features overload protection to prevent you from damaging your cordless power tools in heavy-duty situations, while the discharge protection prevents cell damage.

Why should I use a high voltage lithium ion battery pack?

The temperature management system and individual cell monitoring help maximize battery life. Use this high voltage lithium-ion battery pack to power your Milwaukee M28™ and V28™ cordless power tools.

How do you use a Milwaukee battery pack?

MILWAUKEE Lithium-Ion battery packs are designed to operate in temperatures below freezing. When the battery pack is too cold, it may need to warm up before normal use. Put the battery on a tool and use the tool in a light application. It may "buzz" for a short time until it warms up. When the buzzing stops, use the tool normally.

How does a battery pack work?

To protect itself from damage and extend its life, the battery pack's intelligent circuit monitors current draw and temperature. In extremely high torque, binding, stalling, and short circuit situations, the battery pack will turn OFF the

tool if the current draw becomes too high.

Does the start PAC ® have a removable battery?

This START PAC ® has a separate removable battery for fast and easy battery changes in less than one minute (no tools necessary), This unique feature allows the user to switch the battery in the field without needing to return the unit to the shop or manufacturer for battery replacement; it's virtually maintenance free.
