

SolarMax Energy Systems

3 million solar on-site energy

3.2v 280ah

Overview

What are the top energy technologies for on-site generation?

The top energy technologies leading the way when it comes to on-site generation include: Rooftop solar remains one of the most accessible and cost-effective ways to generate on-site power, particularly for facilities with high daytime energy usage.

How can on-site solar PV & energy storage improve sustainability?

To achieve sustainability goals while meeting the increasing electricity demands of electrification, organizations are pairing on-site solar PV generation with on-site energy storage. These systems, which are considered as “behind-the-meter” (BTM) systems, allow facilities to maximize the benefits of on-site renewable generation.

Who funds the Onsite Energy Program?

The Onsite Energy Program is overseen and funded by DOE's Industrial Technologies Office. The TAPs are also supported by a trio of DOE national laboratories (the National Renewable Energy Laboratory, Oak Ridge National Laboratory, and Pacific Northwest National Laboratory) with subject-matter expertise in onsite energy deployment.

Where can I find information about Onsite Energy?

Visit the Onsite Energy website to: Learn more about the program. Explore technology areas. Find resources. Join upcoming events. Contact OnsiteEnergy@ee.doe.gov with questions.

Should solar PV production be reduced on-site?

Increasing the amount of solar PV production on-site can provide additional cost and emission reductions and resiliency benefits for facilities. However, the additional generation that can result from larger systems during peak daylight hours must be exported or managed through curtailment on-site.

Is rooftop solar a good option for a building?

Rooftop solar remains one of the most accessible and cost-effective ways to generate on-site power, particularly for facilities with high daytime energy usage. These systems can typically offset a large portion of energy consumption in a building and are relatively simple to install.

3 million solar on-site energy

Atrato sells portfolio of rooftop solar assets to ...

Atrato Onsite Energy, the UK's largest owner of commercial rooftop solar, has announced the sale of its entire portfolio of operational assets to a ...
