

## SolarMax Energy Systems

# 300kw wind power generation system design

## Overview

---

Who makes the Wind Turbine 300 kW?

The wind turbine 300 kW is a production of Windkraft System Zürcher AG, a manufacturer from Switzerland. This manufacturer has been in business since 2017. Specialist for the transport of wind farm components throughout Europe. There are no models to this Windturbine. The rated power of Windkraft Zürcher 300 kW is 300,00 kW.

Can a 300 kW wind turbine be built in Iran?

There are abundant high quality wind resources available in Iran; however, the growth of wind turbine industry has been very slow in Iran. This work attempts to address some issues and to preliminary design a site specific 300 kW wind turbine based on manufacturing and economical capabilities and also power demands in the province of Semnan.

What makes kwt300 a good wind turbine?

While most of the mid-size wind turbines are manufactured with the license of old European models, our wind turbine KWT300 are newly designed and equipped with all up-to-date wind turbine design. KWT300 is highly adaptable to the conditions of developing countries because of the following features:.

What is the Windkraft Zürcher 300 kW wind turbine?

The Windkraft Zürcher 300 kW is a 300,00 kW wind turbine produced by Windkraft System Zürcher AG, a Swiss manufacturer established in 2017. It starts generating power at a wind speed of 1,2 m/s and has a cut-out wind speed of 30 m/s.

How many generators does a 300 kW generator use?

The manufacturer has used one generator for the 300 kW wind turbine.

What is the survival wind speed of a kwt300 wind turbine?

Our wind turbines correspond to such land conditions in Japan and other Asian countries, therefore prevent the failure of wind turbines. The basic KWT300 model with the survival wind speed of 70 m/s and turbulence intensity of 0.18. This type is mostly applied The survival wind speed - more than 90 m/s.
