

SolarMax Energy Systems

30kw mobile power supply box for construction site

Overview

What is a 30 kW PDP?

The 30 kW PDP is designed to accept power at 120/208 VAC, 3-phase, using a 100 amp Class-L connector. It then distributes power at 120/208 VAC 3-phase and 120 VAC 1-phase. Power Distribution Panels (PDPs) like the 30 kW PDP are used to provide power to equipment requiring 120/208 VAC electrical power.

What is a Mobile PowerHouse?

It is a reliable and high-performance mobile power solution for big productions, ambitious construction projects, or large-scale events. This emissions-free powerhouse is designed to meet your energy demands while minimizing environmental impact.

What is a voltstack 30K?

The Voltstack 30k is a towable battery electric energy storage system or hybrid energy system with an impressive 30 kW power output and an 80 kWh battery capacity.

How does a 30K electric generator work?

The 30k operates silently without disturbing your surroundings or compromising on comfort. The 30k is essentially a mini-powerplant on wheels. Its towable design allows for easy transportation to different locations. Don't let power limitations hold you back. Experience the true potential of your projects with the 30k electric generator.

How does the voltstack 30K electric generator work?

Seamlessly integrate the 30k electric generator with our proprietary software, NeuronOS™ to effortlessly track, analyze, and optimize energy consumption in real-time. The Voltstack 30k's smart hybrid technology automatically engages a diesel generator when the battery reaches a low charge state.

Why does my construction site need a temporary power delivery?

At some point, every jobsite requires some temporary power delivery. One reason may be because permanent utility power has not yet been installed on your construction site. You could also need power delivered to a hard-to-reach location, or power at the site isn't sufficient for extra tools, lighting, or trailers.
