

## SolarMax Energy Systems

# 30kw three-phase energy storage battery

Efficient  
Higher Revenue

- Max. Efficiency 97.5%
- Max. PV Input Voltage 600V
- 150% Peak Output Power
- 2 MPP Trackers, 150% DC Input Oversizing
- Max. PV Input Current 16A, Compatible with High Power Modules

Intelligent  
Simple O&M

- IP66 Protection Degree: support outdoor installation
- Smart I-V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Type II SPD: prevent lightning damage
- Battery Reverse Connection Protection

Flexible  
Abundant Configuration

- Plug & Play, EPS Switching Under 10ms
- Compatible with Lead-acid and Lithium Batteries
- Max. 6 units Inverters Parallel
- AFCI Function (Optional): when an arc-fault is detected the inverter immediately stops operation

## Overview

---

What is a 30kW power system?

A 30kW system is ideal for: Large Homes (4,000+ sq. ft.) with high energy demands. Commercial Properties needing to offset daytime electricity use. Off-Grid Setups paired with robust battery storage. ROI: With typical savings of 1,500-1,500-3,000/month on energy bills, the system pays for itself in 5-8 years.

How much does a 30kW Solar System cost?

The price of a 30kW solar system ranges between 60,000 and 60,000 and 90,000 before incentives. This includes panels, inverters, mounting hardware, and installation. Battery Storage Add-On: Adding a 30kW battery storage system (e.g., Tesla Powerwall, LG Chem) costs 15,000-15,000-35,000+, depending on battery type and capacity.

How long can a 30kW battery power a house?

Pro Tip: Match battery capacity to your daily energy usage. A 30kW battery bank (30 kWh) can power a home using 30 kWh/day for about 24 hours during outages. 4. How Long Will a 30kW Battery Power a House?

A 30kW battery (30 kWh) provides backup power based on your home's consumption: Basic Needs (lights, fridge, Wi-Fi): 24-48 hours.

What is a 30kW 3 phase controller?

This 30kW Three phase controller combines energy conversion, system control, and intelligent management. If playback doesn't begin shortly, try restarting your device. Videos you watch may be added to the TV's watch history and influence TV recommendations.

Is a 30kW Solar System a good investment?

A 30kW solar system with battery storage is a powerful investment for energy-

intensive households and businesses. While upfront costs are significant, long-term savings, tax incentives, and energy security make it a smart choice for sustainable living. Ready to Go Solar?

How much power can a 30kW Solar System produce?

### 1. What Is a 30kW Solar System, and How Much Power Can It Produce?

A 30kW solar system is a robust renewable energy solution designed to generate significant electricity. On average, it can produce 120-150 kWh per day (or 43,800-54,750 kWh annually), depending on your location, sunlight hours, and panel efficiency.
