6 2Ah lithium battery pack

Overview

How much lithium is in a 2Ah battery?

The amount of lithium (or lithium equivalent) content in a battery or battery pack can be worked out as $0.3 \times \text{amp hour capacity}$. So a 2Ah battery has 0.6 grams of lithium (2×0.3) and a typical laptop battery pack with eight 2Ah cells has 4.8 grams ($8 \text{ units} \times (0.3 \times 2\text{Ah})$).

Can a 6 Ah battery be used as a battery pack?

Batteries with different capacities cannot be used together as a battery pack. But if it is a single battery with the same nominal voltage, it can theoretically be used interchangeably. Therefore, using 6 ah batteries instead of 4 ah is allowed with the same voltage and the same battery material.

Where can I buy lithium-ion battery products?

Lithium-Ion Battery Products - Battery Packs are in stock at Digikey. Order Now! Lithium-Ion Battery Products ship same day.

Where are lithium batteries shipped?

All products are shipped from California. Call us at 510-525-2328 What's New !
What to consider when designing Lithium Batteries?

We own a national standard UN38.3 testing lab. We can provide UN38.3 test service to our customer. If you want to set up your own lab, we also provide UN38.3 & IEC62133 equipments and onsite training.
