

SolarMax Energy Systems

**60v inverter can be used in 48v
power supply**

Overview

Do I need a 12V or 48V inverter?

Simply put, if you have a 12V system, you need a 12V inverter; a 48V system requires a 48V inverter. Standard Pure Sine Wave inverters simply change DC power to AC power. Inverter Chargers handle this function plus allow you to charge your batteries off shore power or a generator. Renogy's 3500W Solar Inverter Charger is designed for a 48V system.

Do 48V power inverters work?

48V power inverters work perfectly in 48V solar systems, which are usually either small commercial or large residential. These inverters are typically paired with 48V PV modules and batteries of a comparable voltage.

Should I use a 60V to 48V converter?

If you want to use all the remaining cells a "dc to dc converter 60V to 48V" would do just that. However they are hard to get for that voltage and high amps. if your controller can take 60v it will be fine just keep an eye on motor temps and avoid WOT if you find it gets hot Dana Point So. Cal It's. Best to have one big battery.

Can I run a 48V controller and motor on a 60V system?

That would definitely not be a good idea unless you use a 48V charger, your existing 60V charger would overcharge the 48V pack. Re: Running a 48v controller and motor --- on a 60v system. Doable?

You might try posting in the e-car sub-forum. You'll get better luck with answers.

Can I run a 60vdc battery on a lower voltage?

If you want to keep using the 60VDC battery system you have, you should buy a controller and motor that are rated at a higher voltage- like 72 VDC. There is

no danger to those items if you run them on a lower voltage. You need to ensure that they will accept a lower voltage for the microprocessor/control circuits, but that is usually not a problem.

Can a controller take 60V?

if your controller can take 60v it will be fine just keep an eye on motor temps and avoid WOT if you find it gets hot Dana Point So. Cal It's. Best to have one big battery. A bunch of tool packs spaghetti string together ?

A battery need to be balance all cells same voltage and capacity. Sunder said:
