60v inverter module

Overview

What is a 60V power inverter?

It makes a lot of sense as an add-on if you're already using 60V tools from Greenworks Pro to take care of your yard work. This 60V 300-watt power inverter simply converts that battery energy into power you can use for charging your electronics or powering small tools like LED work lights and more.

What is a 60V 300 watt power inverter?

This 60V 300-watt power inverter simply converts that battery energy into power you can use for charging your electronics or powering small tools like LED work lights and more. It operates simply. You just take your battery and slide it in—just like you do on your Greenworks 60V chainsaw or other cordless power tools.

What is a power inverter module?

They are notably ideally suited for modular power converter topologies. The power inverter modules are designed for use inside research laboratories, in order to facilitate the rapid prototyping and validation of various converter control techniques.

Which power inverter modules are best assembled?

Imperix power inverter modules are best assembled within rack-mountable frames or enclosures. This guarantees the highest flexibility, thanks to the modular nature of the power modules. For those who appreciate the corresponding ease of use, imperix can provide pre-assembled chassis with power supplies and various other features.

What is a GreenWorks 60V power inverter?

With a single 120V outlet and dual USB ports, you get a lot of charging and power options. While a tad pricey, it works as a very handy peripheral device

to go along with your Greenworks 60V yard tools. The Greenworks 60V 300W power inverter (model 2950102T) is a battery inverter that works with any of the company's 60V batteries.

What types of inverter modules are available?

Inverter modules are available using either IGBT or MOSFET semiconductors. Grid-connected inverters and motor drive applications, up to 8kW per module. Fast-switching and medium-frequency applications, up to 200kHz. 120VAC, teaching and general-purpose applications, up to 6kW per module.
