

## SolarMax Energy Systems

# Albanian wind power energy storage system manufacturer

## Overview

---

Does Albania have a wind power capacity?

Although Albania has currently no wind power capacity, the country also presents a significant cost-competitive wind potential based on IRENA's estimates.

Could a gigawatt power plant be in Albania?

Masdar and state-owned power utility KESH signed a joint venture term sheet agreement to explore the development of gigawatt-scale projects in Albania. The renewable electricity plants, potentially with storage, would supply power to the country and its neighbors.

Are Masdar and Kesh developing gigawatt-scale green energy projects in Albania?

Masdar and state-owned power utility KESH are exploring the development of gigawatt-scale green energy projects in Albania.

Is Albania a net energy importer?

Today, Albania remains a net energy importer as domestic energy production is not able to meet demand. When it comes to renewable energy imports, Eurostat data shows that the country ranks 8 th in Europe.

Why does Albania need to import energy?

Changing weather patterns over the years have forced the country to import energy to cover domestic needs, as a lack of storage capacity requires Albania to sell its generated power during peak months of production.

How can Albania solve the energy crisis?

In addition to eliminating the electricity deficit and taking electrification to new sectors, Albania can increase its potential to unlock new industries and

investment using clean energy. The country can explore opportunities to produce green hydrogen through solar and wind power.
