Australia 12v inverter

Overview

What is a 12V power inverter?

GEAR UP FOR SPRING - ! A 12V power inverter will convert the power supply generated by your DC power source – such as an auxiliary battery or your vehicle's alternator, and convert it to AC power that allows you to run everyday household items and charge laptops, cameras and other electronics.

Where can I buy an inverter in Australia?

Share contact information, store details, and brand content with your customers. Inverter.com.au is the online inverter store for Australia's best inverters. Suppliers of quality inverter, sine wave inverter, inverter charger, solar inverter and off grid solar systems, power inverter technology for over 20 years.

What is a power inverter?

A power inverter is simply a box or unit whose overall size and weight is smaller than a car battery. One end is connected to a DC source, the vehicles battery (usually a hard wired connection) the other has one or multiple 240V power outlets. Inverters have a fuse or built in circuit breaker for protection.

How do itechworld inverters work?

iTechworld inverters do one job and do it right. They take 12V DC power from your battery and convert it into 240V AC mains power. That means you can power your everyday appliances anywhere you go, from your caravan to your campsite to a remote jobsite. But unlike cheap modified sine wave units, our inverters deliver pure sine wave output.

How do I get the best out of my power inverter?

To get the best out of your power inverter you need a good reliable power source. Some of these area's are worth a look to help give you a complete

solution: Use an inverter and turn that 12 volt power into powering any appliance. Repco's range of inverters are compact and with leading brands at the best prices.

How do I choose a good inverter?

Before buying the inverter you need to work out what you want it to power. You get that device and look at its power rating. The inverter you purchase needs its delivery output to exceed the power rating of the device by around approx 20%. If running more than one device at the same time add the power ratings together and add in the 20%.
