

## SolarMax Energy Systems

# Australian energy storage fire equipment manufacturer

## Overview

---

What are Australian companies doing about battery technology?

Australian companies and research institutions are working to develop and manufacture new battery technologies, and explore thermal energy storage, hydrogen energy storage and other technologies that promise to offer longer duration, lower degradation, and better sustainability.

What is the energy storage industry?

Energy Storage forms part of the Energy industry, which is the 15th most popular industry and market group. If you're interested in the Energy market, also check out the top Energy & Cleantech, Renewable Energy, Recycling, Oil & Gas or Energy Efficiency companies. Advanced energy storage solutions.

Is Australia ready for a sustainable aviation fuel industry?

Australia's national science agency CSIRO has developed a roadmap for a local sustainable aviation fuel (SAF) industry<sup>5</sup>, with the Australian Renewable Energy Agency (ARENA) investing in domestic SAF production from agricultural feedstocks<sup>6</sup>.

Can Australian engineering & service organisations help build a new wind industry?

Australian engineering and service organisations are looking to transfer their extensive experience and expertise in large-scale subsea oil and gas projects, and their long, successful history in marine construction, to support building this new offshore wind industry and to capture future global wind opportunities.

How can Australian companies support higher renewable penetration?

Australian companies have developed a range of software platforms that perform energy modelling, forecasting, monitoring, and trading to allow electricity grids to support higher renewable penetration.
