

## **SolarMax Energy Systems**

# **Australian energy storage project announced**

## Overview

---

HiTHIUM, a leading global company in energy storage technology, announced the deployment of energy storage systems with a total capacity of 500MWh in Victoria, Australia for FRV – Fotowatio Renewable Ventures, a leading developer of sustainable energy solutions. Where is Australia's fifth largest battery energy storage system located?

Construction of the fifth largest battery energy storage system in Australia has begun, located six kilometres from Port Pirie, South Australia, owned by Canadian-headquartered renewables developer Amp Energy.

Will Australia build a battery storage plant in New South Wales?

Another Australian project, proposed by integrated energy company Origin Energy would site 700MW / 2,800MWh of batteries at a retiring coal power station, also in New South Wales and French developer Neoen has filed a plan, to build a 500MW / 1,000MWh battery storage project in the state.

What is Australia's energy storage capacity?

Australia had 2,325MW of capacity in 2022 and this is expected to rise to 22,076MW by 2030. Listed below are the five largest energy storage projects by capacity in Australia, according to GlobalData's power database. GlobalData uses proprietary data and analytics to provide a complete picture of the global energy storage segment.

How much energy storage capacity will Australia have in 2022?

Global energy storage capacity was estimated to have reached 36,735MW by the end of 2022 and is forecasted to grow to 353,880MW by 2030. Australia had 2,325MW of capacity in 2022 and this is expected to rise to 22,076MW by 2030.

Will Australian Energy Policy unnerve investors?

(Supplied: Pacific Green Australia) Energy policy is a key point of difference

between the major parties and Dr Dwyer said a shift away from renewables could unnerve investors following the federal election in May. "It would cast some doubt over Australia's transition to net zero mostly through renewable energy projects," he said.

Could big batteries solve Australia's energy problems?

This big battery project in Kwinana, WA, sits alongside a coal-fired power plant that is being dismantled. (ABC News: Clint Jasper) Dr Dwyer said big batteries were not the only solution to Australia's energy issues, but would play a significant role in the future.
