

**SolarMax Energy Systems**

# **BMS battery price in Jamaica**

## Overview

---

How much does a BMS cost?

Average active BMS price range: \$500-\$2,000. Hybrid BMS – As the name implies, hybrid BMS combines elements of both passive and active systems. This allows optimized functionality per cell at lower costs than purely active BMS. Hybrid systems actively balance while monitoring voltages, while allowing passive shunting on cell voltage thresholds.

What factors affect BMS pricing?

Scale of System – The size of the battery bank and the capacity that the BMS must handle also impact costs. Prices increase with higher voltage, amp capacities, and parallel/series configurations. Battery Voltage – BMS pricing often correlates to common battery voltages used.

Why is battery voltage factor important in BMS pricing?

R&D Investment – Cutting-edge BMS capabilities require intensive R&D that market leaders pass along in pricing. The battery voltage factor is an important one for determining BMS costs.
