

SolarMax Energy Systems

Bahamas Island Solar Power Generation for Home Use

Overview

Development of the four solar-fueled power systems will set the stage to scale the Family Islands solar program across the island chain's outlying islands, as well as contribute to the Bahamas achieving a national goal of renewable energy resources meeting 30% of electricity needs by 2030.

The Islands Energy Program team hasn't found an instance yet "where importing natural gas, diesel, propane or other fossil fuel for power generation is cheaper.

Three pillars support the program. The first is strategic planning that enables island governments, private and public-sector enterprises to undertake.

Those characteristics led Shell to propose investing very large sums of capital to build out a 220-250-MW natural gas power plant. "It's still early days. There's no.
