# Bahamas Small Solar Power Generation System

## Overview

---

Three pillars support the program. The first is strategic planning that enables island governments, private and public-sector enterprises to undertake national clean energy transition programs and projects. The result is the blueprint of a least-cost pathway for capital investment that identifies and motivates.

The Islands Energy Program team hasn't found an instance yet "where importing natural gas, diesel, propane or other fossil fuel for power generation is cheaper.

Those characteristics led Shell to propose investing very large sums of capital to build out a 220-250-MW natural gas power plant. "It's still early days. There's no.
