

## SolarMax Energy Systems

# Bahamas Solar Power Generation for Home Use

## Overview

---

Development of the four solar-fueled power systems will set the stage to scale the Family Islands solar program across the island chain's outlying islands, as well as contribute to the Bahamas achieving a national goal of renewable energy resources meeting 30% of electricity needs by 2030.

The Islands Energy Program team hasn't found an instance yet "where importing natural gas, diesel, propane or other fossil fuel for power generation is cheaper.

Three pillars support the program. The first is strategic planning that enables island governments, private and public-sector enterprises to undertake.

Those characteristics led Shell to propose investing very large sums of capital to build out a 220-250-MW natural gas power plant. "It's still early days. There's no.

Does the Bahamas need a solar power plant?

The need to protect the tourism industry is an added incentive. In 2023, the Bahamas opened the first of two solar plants in Grand Bahama. The two solar plants are expected to cut more than 5,000 tons of CO<sub>2</sub> emissions per year. The government pledged to generate 30 percent of the country's energy from renewable sources by 2033.

Who is Bahamas solar?

At Bahamas Solar we take care of your project from start to finish. Offering full turnkey systems for all residential and commercial operations. Serving all The Bahamas, from Nassau to the out islands. We offer customized solutions tailored to your specific needs. The first step to going solar is a site assessment.

Who supports solar power in the Bahamas?

This goal is supported by the Inter-American Development Bank (IDB) and the Bahamas Development Bank (BDB). Currently, solar power makes up less than 1% of all energy generated in The Bahamas. Oil is responsible for nearly all

power generation with a 99% share of electricity production.

Is solar a good option in the Bahamas?

On a kilowatt-hour (kWh) by kilowatt-hour basis, solar's your best, but you need to add battery energy storage capacity in order to reach higher levels of penetration," he noted. "Nassau's [the Bahamas' largest city] is a pretty big grid, and it can take a fair bit of solar without storage," Burgess continued.

Is the Bahamas a difficult place to generate electricity?

BPL Chairman Donovan Moxey was quoted in a Tribune Business news report. The Bahamas is a very difficult place to generate electricity, distribute it and sell it, even as compared to other Caribbean islands, Chris Burgess, Islands Energy Program projects director, told Solar Magazine.

What is the Bahamas national energy policy?

The latest release of The Bahamas National Energy Policy documents the country's plans to implement renewable energy generation. This will introduce net-metering, which is the recording of energy flows in both directions. As the Bahamas has close to six daily peak sun hours. Solar Power can offset a significant part of your power bill.
