Bahrain exports energy storage

Overview

How do I export data from Bahrain?

Data is now available through the .Stat Data Explorer, which also allows users to export data in Excel and CSV formats. Bahrain's energy supply comes largely from the exploitation of its domestic fossil fuels resources. The country is also a major producer and exporter of oil, petroleum products and natural gas.

Is Bahrain an energy importer?

Bahrain is a net energy exporter. It was the first place on the Arabian side of the Persian Gulf where oil was discovered, and the First Oil Well, located below Jabal al Dukhan, has operated since 1932. Primary energy use in Bahrain was 110 TWh and 139 TWh per million persons in 2009, and 107 TWh and 139 TWh/million people in 2008.

Where does Bahrain's energy supply come from?

Bahrain's energy supply comes largely from the exploitation of its domestic fossil fuels resources. The country is also a major producer and exporter of oil, petroleum products and natural gas. Bahrain's energy supply comes largely from the exploitation of its domestic fossil fuels resources.

How much does Bahrain export in a year?

Bahrain exported USD 8.1 Billion worth of products and services in non-oil industries throughout 2020 to over 150 other countries.

What is the energy situation in Bahrain?

Energy in Bahrain refers to the energy and electricity production, consumption, and import in the country. Bahrain is a net energy exporter. The primary energy use in Bahrain was 110 TWh and 139 TWh per million persons in 2009, and 107 TWh and 139 TWh/million people in 2008.
