

SolarMax Energy Systems

Bangladesh operational energy storage project

Overview

According to the request for proposals issued on July 30, the program calls for 16 standalone projects, each rated at 10MW/40MWh, totaling 160MW/640MWh of four-hour storage capacity. Selected developers will design, build, own, and operate the systems under 15-year agreements. Can energy storage be used in Bangladesh?

Concluded in May 2023, the assignment assessed available energy storage technologies, evaluated the role of energy storage in the current grid conditions, identified potential storage locations, analysed energy storage requirements under variable renewable energy (VRE) integration, and developed a roadmap for energy storage in Bangladesh.

What can be done about grid connected energy storage in Bangla-Desh?

Limited experience and knowledge of grid connected energy storage in Bangladesh. Early-stage pilot programmes such as the planned 2MW grid connected BESS funded by the Asian Development Bank (ADB) would further support capacity building and knowledge transfer. 3.3.

What's in the Bangladesh Power Sector Roadmap?

The roadmap highlights specific use-cases for consideration in the Bangladesh power sector over three different future time horizons. It also includes a summary of indicative policy and regulation actions and interventions that may be considered to enable the deployment of energy storage within the defined time horizons.

How does the power sector support transport in Bangla-Desh?

The power sector continues to support the ongoing electrification of transport in Bangladesh, through various initiatives undertaken by distribution companies and the roll-out of an EV charging tariff.

What is the financial model for EV-Bess deployment in Bangladesh?

The current financial model for EV-BESS deployment in Bangladesh relies on a service payment to EV-BESS projects. This payment model does not create bankable projects due to the lack of any long-term fixed revenue streams. However, additional commercial revenue streams may be leveraged to improve commercial viability of these projects.

Does the EU support green energy transition in Bangladesh?

The EU engagement and financial commitment in support to the green transition in Bangladesh covers different aspects of the power sector. This year, the EU has designed a comprehensive financing package of EU grant support towards Bangladesh Green Energy Transition.
