

SolarMax Energy Systems

Base station battery management customization

Overview

Why do telecom base stations need a battery management system?

As the backbone of modern communications, telecom base stations demand a highly reliable and efficient power backup system. The application of Battery Management Systems in telecom backup batteries is a game-changing innovation that enhances safety, extends battery lifespan, improves operational efficiency, and ensures regulatory compliance.

What makes cm batteries a good battery management system?

Reputable MOS & ICs: CMB's battery management system (BMS) is built with a reputable chipset with RICOH, Seiko, TI, and BQ. CM Batteries has designed hundreds of BMS solutions for our customers. Each custom battery pack solution has their unique working mode and request for electronic performance.

What is a battery management system?

The battery management systems monitor the individual cells working status and provide advanced safety features to prevent overcharging, over-discharging, overheating, and short circuit protection.

What is CMB's battery management system design?

CMB's battery management system design includes cell voltage tracking, cell balancing, and health status readings for battery packs by App and computer.

Why do telecom base stations need backup batteries?

Backup batteries ensure that telecom base stations remain operational even during extended power outages. With increasing demand for reliable data connectivity and the critical nature of emergency communications, maintaining battery health is essential.

Why is a battery management system important?

In a telecom environment, operational efficiency is key to sustaining high uptime and performance. A BMS contributes to this by: Providing Real-Time Data: Operators gain immediate insights into battery performance, allowing for informed decision-making and rapid response to issues.

Base station battery management customization

KS1 - High Power Base Station Kit

Each kit contains all necessary components for immediate use, including: battery, cables, antenna, antenna mast, tripod and carrying bags. Custom variations of ...

5g Communication Base Station Support Customization Aluminium Air Battery

Product We can supply aluminum air battery,refilling aluminum sheet and finished products using aluminum air battery with completed BMS s appearance can be our design or you can order ...

12.8V6Ah

Nominal voltage (V):12.8
 Nominal capacity (Ah):6
 Rated energy (WH):76.8
 Maximum charging voltage (V):14.6
 Maximum charging current (A):6
 Floating charge voltage (V):13.6~13.8
 Maximum continuous discharge current (A):10
 Maximum peak discharge current @10 seconds (A):20
 Maximum load power (W):100
 Discharge cut-off voltage (V):10.8
 Charging temperature (°C):0~+50
 Discharge temperature (°C):-20~+60
 Working humidity: <95% R.H (non condensing)
 Number of cycles (25 °C, 0.5C, 100%DoD): >2000
 Cell combination mode: 32700-4s1p
 Terminal specification: T2 (6.3mm)
 Protection grade: IP65
 Overall dimension (mm):90*70*107mm
 Reference weight (kg):0.7
 Certification: UN38.3/MSDS
