

SolarMax Energy Systems

Belgian Energy Storage Industry Planning Scheme

Overview

What is the energy storage project in Belgium?

The main energy storage project in Belgium is the construction and operation of an offshore “energy atoll” (essentially a manmade offshore pumped-storage facility), for which the Electricity Act has been modified in 2014 (see below), in order to support offshore wind-generated electricity production.

What is Belgium's energy policy?

With the publication of the Belgian Federal, Flemish, and Walloon government agreements, Belgium’s energy policy has taken shape, emphasising pragmatism, energy security, industrial competitiveness, and a clear return to nuclear power.

What will Belgium do to improve energy prices?

Price monitoring will be intensified, and the CREG will expand its analysis of energy prices in export markets to ensure competitiveness. The government also announced continued efforts to make energy invoices more transparent. Hydrogen: Belgium aims to position itself as a hub for hydrogen and its derivatives.

How much storage capacity does Belgium need in 2020?

The need for storage capacity in Belgium is expected to increase from 7 GW to 12 GW in 2020.

Is Giga storage planning a 300MW project in Belgium?

In September, Giga Storage, a BESS developer based in the Netherlands, announced that it is planning a 300MW/1,200MWh project in Belgium which would be connected directly to the transmission network via existing 380kV high-voltage transmission lines nearby. Read more coverage of the Belgian market on [Energy-Storage.news](https://www.energy-storage.news).

How will nuclear energy affect Belgium's future energy policy?

Contrary to previous policies, nuclear energy will play a crucial role in Belgium's future energy policy. The government has announced a program to revive Belgium's nuclear industry and repeal all provisions related to the nuclear phase-out and the ban on new capacity construction.
