

SolarMax Energy Systems

Bolivian Electricity and Energy Storage Investment Company

Overview

The electricity sector in is dominated by the state-owned (Empresa Nacional de Electricidad), although the private Bolivian Power Company (Compañía Boliviana de Energía Eléctrica; COBEE) is also a major producer of electricity. ENDE had been unbundled into , and and privatized in the 1990s, but most of the sector.

Who produces electricity in Bolivia?

The electricity sector in Bolivia is dominated by the state-owned ENDE Corporation (Empresa Nacional de Electricidad), although the private Bolivian Power Company (Compañía Boliviana de Energía Eléctrica; COBEE) is also a major producer of electricity.

What is Bolivia's solar electrification project?

This initiative is a testament to Bolivia's commitment to renewable energy and its vision for a more sustainable and equitable future. Bolivia solar electrification project brings clean energy to 20,000 rural families with a \$325M investment. Discover how this bold move powers sustainable growth!.

Why should Bolivia invest in solar energy?

Bolivia's investment in rural electrification through solar energy is a significant achievement with lasting impacts on the country's energy landscape. As the project progresses, it will continue to enhance the lives of thousands of families, support economic development, and contribute to Bolivia's environmental sustainability goals.

How many electricity projects are there in Bolivia?

Bolivia currently has over a dozen electricity generation projects (hydroelectric, solar, combined cycle, and geothermic) and transmission line projects in progress and over 30 projects under study, including the construction of two biomass power plants. Bolivia plans to invest billions towards expanding its electric grid through 2025.

What percentage of electricity is distributed in Bolivia?

The nationalized electricity distribution companies account for 51 percent of the distribution market. These companies fall under ENDE (the National Electricity Company). Bolivia's electricity production is based on thermoelectricity (71 percent), hydroelectricity (20 percent), and solar and wind (9 percent).

Is Bolivia a good place to get electricity?

In 2005, total access to electricity in Bolivia was 67%, one of the lowest in Latin America. Urban access was 87%, while rural access remained as low as 30%. (See Recent Developments for more information on electrification plans) Service quality as measured by interruptions was much better than the LAC average in 2005.

Efficient Higher Revenue

- Max. Efficiency 97.5%
- Max. PV Input Voltage 600V
- 150% Peak Output Power
- 2 MPPT Trackers, 150% DC Input Oversizing
- Max. PV Input Current 15A, Compatible with High Power Modules

Intelligent Simple O&M

- IP66 Protection Degree: support outdoor installation
- Smart I-V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Type I SPDs prevent lightning damage
- Battery Reverse Connection Protection

Flexible Abundant Configuration

- Plug & Play, EPS Switching Under 15ms
- Compatible with Lead-Acid and Lithium Batteries
- Max. 6 Units Inverters Parallel
- AFQ Function (Optional): when an arc fault is detected the inverter immediately stops operation
