

## SolarMax Energy Systems

# Brazil's energy storage photovoltaic project

## Overview

---

Over the next three years, the collaboration will deploy 400MWh of energy storage systems across Brazil, with a total investment of around 500 million reais (equivalent to 710 million yuan) backing the project. Could solar power reduce diesel consumption in Brazil?

Brazilian farmers have been expanding their solar energy capacity and testing batteries as a storage solution, in a bid to make electricity supplies more predictable and potentially reduce diesel consumption, according to growers and experts.

What is solar energy used for in Brazil?

In Brazil, solar energy is used for various purposes including heating water and generating electricity in homes, commercial buildings, industrial plants, and other facilities. The total installed capacity of solar panels in Brazil has reached 4,900 MW.

What is the biggest solar power project in Brazil?

The plant is developed by Enel. Enel through EGBP has started operating its Lapa solar park, which is the biggest solar power project operation in Brazil at present. The plant is situated in Bom Jesus da Lapa, in the north-eastern state of Bahia. Lapa project is made up of 2 plants: Lapa- with an installed capacity of 78 megawatts.

How much does a solar power plant cost in Brazil?

The cost of building a solar power plant in Brazil under the EPC contract varies widely, with each MW of installed capacity costing the investor approximately BRL  $\approx$  3-5 million.

Are battery storage systems viable in Brazil?

In Brazil, the cost of turn-key battery systems is notably high due to significant tax burdens. However, future projections indicate a potential reduction in

battery costs, which could enhance economic feasibility for various applications. The booklet explores the viability of battery storage systems across different scenarios. For instance:.

Will Brazil conduct the first energy storage auction?

Brazil is set to conduct the country's first-ever energy storage auction for adding batteries and storage systems to the national power grid.
