# Brazil wind and solar storage adjustment

## Overview

---

Will wind and solar light up Brazil's power?

The post Hope shines in Brazil as wind and solar light up over 34% of the nation's power appeared first on Cleantech Times. Brazil has achieved a remarkable milestone in August 2025. For the first time ever, wind and solar energy together generated more than one-third of the country's electricity.

Are wind and solar power reshaping Brazil's energy mix?

Wind and solar power are also reshaping the country's energy mix. In 2024, they generated 24% of Brazil's electricity, more than double their share from five years earlier. Solar power grew from just over 1% of generation in 2019 to 9.6% in 2024, while wind climbed from 8.8% to 15% over the same period.

Why is Brazil reshaping its energy mix?

Ember said the rapid growth of wind and solar helped Brazil avoid similar surges this year. Wind and solar power are also reshaping the country's energy mix. In 2024, they generated 24% of Brazil's electricity, more than double their share from five years earlier.

Does Brazil need solar and wind?

"Brazil shows how a rapidly growing economy can meet its rising need for electricity with solar and wind," said Raul Miranda, Ember's global program director based in Rio de Janeiro. "Solar and wind are a perfect match for Brazil's hydropower resources, taking the pressure off in drought years.

Is Brazil's power sector going down?

Brazil's power sector emissions peaked in 2014 and by 2024 had fallen 31% even as electricity demand rose 22%, Ember said. The think tank credited a fifteenfold increase in wind and solar generation with outpacing demand growth and cutting fossil generation by 45%.

Why does Brazil need more clean power?

With more clean power in the mix, the country has managed to grow its economy, meet rising electricity demand, and reduce its reliance on fossil fuels—all at the same time. The post Hope shines in Brazil as wind and solar light up over 34% of the nation's power appeared first on Cleantech Times.
