Bulgaria export outdoor power supply

Overview

Bulgaria's power sector is diverse and well developed, with universal access to the grid and numerous cross-border connections in neighboring countries. A key driver of the Bulgarian economy, the energy sector.

How much electricity does Bulgaria export a year?

In the past year, the export of electricity reached record levels of 12.2 TWh, which is an increase of 39% compared to the previous year, ranking Bulgaria third among the largest exporters of electricity in the European Union. Electricity production capacities meet consumer demand in Bulgaria and enable exports to neighboring markets.

How much electricity does Bulgaria produce in 2022?

In 2022, the Bulgarian energy industry exported more than 12 TWh of electricity totaling to EUR 3 billion, (USD 3.24 billion). Currently, the installed power generation capacity in Bulgaria is 13.247 MW, and the available capacity is 10,771 MW.

How much energy does Bulgaria produce?

Currently, the installed power generation capacity in Bulgaria is 13.247 MW, and the available capacity is 10,771 MW. To support its energy needs, Bulgaria imports natural gas, oil and oil products, and solid fuels (anthracite and black coal, coal coke). The main local energy source in Bulgaria is lignite coal.

Does Bulgaria have a hydro power plant?

In Bulgaria, the National Electric Company (NEK) owns 15 conventional hydro and pumped-storage plants. Hydropower's importance is not limited to the production of energy because it plays a key role in greenhouse gas emissions reduction. Bulgaria remains the most energy-intensive economy in the EU by a wide margin.

Does Bulgaria have a supply monopoly?

The regulated Bulgarian electricity market is dominated by a few major players that have built a supply monopoly. undertaking, there is no real competition in the distribution market that could enable consumers to choose their supplier, as there is only one licensed supplier in each geographical region.

How much power will Bulgaria have in 2023?

In addition, the ESO signed agreements with power distribution companies for an additional 3 GW, to be added in the next three to five years. In the last three years, Bulgaria's photovoltaic installed capacity practically doubled, to 2.2 GW, with another 700 MW expected to become operational in 2023.
