Burundi Communications Green Base Station Equipment

Overview

Radio is the main source of information for many Burundians. • : • : 440,000 radios in use (1997). • : • : 25,000 sets in use (1997).

What types of communications are available in Burundi?

Communications in Burundi include radio, television, fixed and mobile telephones, the Internet, and the postal service in Burundi . Radio is the main source of information for many Burundians.

What is a green base station solution?

The green base station solution involves base station system architecture, base station form, power saving technologies, and application of green technologies. Using SDR-based architecture and distributed base stations is a different approach to traditional multiband multimode network construction.

What radio station does Bujumbura have?

[needs update] The BBC World Service broadcasts on 90.2 FM in the largest city and former capital, Bujumbura, and on 105.6 in Mount Manga; Radio France Internationale and the Voice of America are also available in the capital.

Does Burundi censor the media?

Operating in a turbulent political climate, Burundi's media are subject to occasional government censorship and may practice self-censorship. The constitution and law provide for freedom of speech and press, and the government generally respects these rights.

What should a base station do in a wireless communications network?

In a wireless communications network, the base station should maintain highquality coverage. It should also have the potential for upgrade or evolution. As network traffic increases, power consumption increases proportionally to the number of base stations. However, reducing the number of base stations may degrade network quality.
