# Burundi sells household photovoltaic power stations to generate electricity

## Overview

---

This power station is the first grid-connected solar project developed by an IPP in Burundi. It is also the first major electricity generation investment in the country, in the past 30 years. The renewable energy infrastructure was on the books since 2016. Attempts were made to start construction in 2018, but the process aborted. In January 2020, construction started in earnest. Despite dela. SummaryThe Mubuga Solar Power Station is a grid-connected 7.5 MW power plant in . The power station was.

The power station is located in the settlement of Mubuga, in the of Burundi, approximately 15.2 kilometres (9 mi), northeast of the city of , the political capital of that country. .

A number of financial institutions participated in the financing of this renewable energy project. The Renewable Energy Performance Platform, based in London, United Kingdom, "provided a bridge loa.

At the time of commissioning in October 2021, it was reported that the 7.5 MW power plant contributed 10 percent to the country's generation capacity at that time. The energy generated here is enough to supply an e.

What is the solar PV project in Burundi?

The solar PV project in Burundi is a 7.5 MW plant located in Mubuga. Interconnection is expected in Q3 2020, which will increase Burundi's installed electricity capacity by 14%.

Where is a solar power station located in Burundi?

The power station is located in the settlement of Mubuga, in the Gitega Province of Burundi, approximately 15.2 kilometres (9 mi), northeast of the city of Gitega, the political capital of that country. This power station is the first grid-connected solar project developed by an IPP in Burundi.

Does Burundi have solar power?

Burundi has natural conditions favourable to the sustainable use of water and solar energy or wind power. The solar potential of Burundi is very interesting.

The average annual power received is around 2000 kWh / m<sup>2</sup> per year, equivalent to the best European regions (southern Mediterranean).

What does Burundi's solar plant announcement mean for the energy sector?

According to Geoff Sinclair, Managing Director of Camco Clean Energy, which manages REPP: "Once built, the solar plant will add nearly 15% to Burundi's generation capacity using clean energy." (This passage directly answers the question about the impact on the energy sector.).

How many people were hired to operate Burundi's solar power station?

Another estimated 25-50 people were hired to operate the power station. In May 2023, Evariste Ndayishimiye, the president of Burundi toured the solar farm and personally gave his approval for the power station's capacity to be expanded to 15 megawatts.

Who toured Burundi's solar farm in May 2023?

In May 2023, Evariste Ndayishimiye, the president of Burundi toured the solar farm and personally gave his approval for the power station's capacity to be expanded to 15 megawatts. ^ a b c d e Jean Marie Takouleu (26 October 2021).
