

## SolarMax Energy Systems

# Cambodia Power System Base Station

## Overview

---

What is Cambodia's power development master plan 2022-2040?

In its Power Development Master Plan (PDP) 2022-2040, Cambodia announced that there would no more investment of coal power plants after 2024, and renewable energy (domestic and imported) would play a significant role towards Cambodia's transition to clean energy.

How much money does Cambodia need to build a power plant?

The Cambodian government has stated in its PDP that it will need \$9 billion of investment to develop new power plants and expand the national grid, of which \$2.5 billion has been approved between 2022 and 2025. Opportunities exist for power generation and transmission equipment.

What is Cambodia's Power Development Plan (PDP)?

It is developed and approved by the Royal Government of Cambodia. The PDP is a comprehensive and long-term plan for the development of Cambodia's power sector, and it lays out a detailed roadmap for the 2022-2040 period, which includes demand forecasts, generation expansion, and transmission and distribution.

What happened to Cambodia's first coal-fired power plant?

The 100 MW power station was commissioned in 2014. It was Cambodia's first coal-fired power plant. Starting when it was first proposed in 2008, the plant faced strong opposition from local residents over its environmental and health effects. In February 2010, a financing agreement for units 1 and 2 was closed.
