

## SolarMax Energy Systems

# Cambodia Valley Energy Storage Battery

The image shows a house with solar panels on the roof. In the foreground, there is a large stack of SolarMax energy storage batteries. To the right of the batteries, there are four circular icons with text descriptions:

-  **easy to install and use**
-  **World wide Products**
-  **faster charging and discharging**
-  **Multiple protection with alarm systems**

**Can save energy**

the battery capacity can be increased freely and flexibly according to the situation of home use.

Rechargeable lithium batteries use safe LiFePO<sub>4</sub>

## Overview

---

Can battery energy storage be used to power Cambodia's grid?

“The battery energy storage system will showcase how large-scale deployment of innovative technology applications can be used to operate Cambodia’s grid in the future and generate more renewable power.”.

What is a battery energy storage system?

The battery energy storage system supported by the project is capable of storing 16 megawatt-hours of electricity and providing services to help with renewable energy integration, transmission congestion relief, and balancing of supply and demand, among others.

Is a battery energy storage system the future of energy?

The Cambodian Minister of Mines and Energy, Keo Rattanak, is targeting 70% renewable energy by 2030. Battery energy storage systems (BESS) have emerged as a transformative technology in global energy markets, enabling the efficient integration of renewable energy, enhancing grid stability, and providing access to electricity in off-grid areas.

Can solar energy be used intermittently in Cambodia?

However, the intermittent nature of solar energy benefits from robust storage solutions to store excess generation and provide power during low solar output periods, like the dry season. The Cambodian Minister of Mines and Energy, Keo Rattanak, is targeting 70% renewable energy by 2030.

Should Cambodia regulate rooftop solar power?

In March 2023, Cambodia launched the “Principles for Permitting the Use of Rooftop Solar Power,” to regulate rooftop solar installations and ensure “transparency, accountability, and fairness.” Renewable energy, particularly solar, holds great promise for Cambodia.

Why is energy production increasing in Cambodia?

Domestic energy production has been increasing at a rate of 8% per year since 2010. As Cambodia continues its journey toward sustainable economic development, energy security and sustainability are at the forefront of national priorities.
