

## SolarMax Energy Systems

# Can Samoa use solar energy

## Overview

---

Does Samoa have a solar grid?

Samoa's first grid connected solar. Samoa, the first country to access the Pacific Environment Community (PEC) Fund since its inception in 2010 is finally having their first solar photovoltaic grid system commissioned for use in Salelologa, Savai'i.

How much electricity does Samoa generate?

016, now stands at 11MW. These included Sun Pacific Energy (2MW), Green Power Samoa at Faleata Racecourse (4MW) and Solar for Samoa (5MW). With the introduction of the 550kW wind turbine in 2014, Samoa have since generated 488MWh of electricity with 201.

What are the main energy sources in Samoa?

ne, LPG and electricity. Hydro Power – Contribution from hydro power to the overall energy production in Samoa over the years have been decreasing considerable from a general annual generation of 3.9- 4.9ktoe in the early 2000 to average of 2.8ktoe in the last three years. This has reflected a drop of.

How long will Samoa's solar project last?

The project expected to last more than 20 years is spread out over three sites in the country's main islands, Upolu and Savai'i. "Today, we are opening Samoa's first solar system, without storage, that can be connected to the grid, to run in parallel with other energy sources like diesel generators.

What is Samoa's energy mandate?

The mandate also includes addressing critical environmental, social, and gender considerations to ensure the project's sustainability and inclusiveness. Samoa currently relies on imported fossil fuels for approximately 69% of its electricity generation, leaving the country vulnerable to volatile oil prices.

Does Samoa have enough dietary energy?

Access to enough dietary energy is not an issue in Samoa, as health problems are mainly the consequence of the quality of the dietary energy that is being consumed, rather than the quantity. Further analysis of the 2018 HIES shows that only 13 food products contribute to 80 percent of the total dietary energy consumed.

-  **Efficient Higher Revenue**
  - Max. Efficiency 97.5%
  - Max. PV Input Voltage 600V
  - 150% Peak Output Power
  - 2 MPPT Trackers, 150% DC Input Overvoltage
  - Max. PV Input Current 16A, Compatible with High Power Modules
-  **Intelligent Simple O&M**
  - IP66 Protection Degree: support outdoor installation
  - Smart I-V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
  - DC & AC Type II SPDs prevent lightning damage
  - Battery Reverse Connection Protection
-  **Flexible Abundant Configuration**
  - Plug & Play, EPS Switching Under 10ms
  - Compatible with Lead-acid and Lithium Batteries
  - Max. 6 Units Inverters Parallel
  - AFCI Function (Optional): when an arc fault is detected the inverter immediately stops operation
