

## SolarMax Energy Systems

# Can a 60v lithium battery pack be used in 17 strings

### LIQUID COOLING ENERGY STORAGE SYSTEM

**EMS** real-time monitoring  
No container design  
flexible site layout

Cycle Life  
**≥8000**

Nominal Energy  
**200kwh**

IP Grade  
**IP55**

## Overview

---

How many strings should a lithium battery have?

Therefore, the lithium battery must also be about 58v, so it must be 14 strings to 58.8v, 14 times 4.2, and the iron-lithium full charge is about 3.4v, it must be four strings of 12v, 48v must be 16 strings, and so on, 60v There must be 20 strings in parallel with the same model and the same capacity.

How many lithium batteries can be connected in series?

Lithium battery pack 48V20AH generally single lithium battery is 3.5V, so 48V lithium battery pack needs  $48/3.5=13.7$ , just take 14 in series. If the manufacturer has provided a set of 12V lithium batteries, then 4 can be connected in series. As long as the output voltage is 48V, the current is 2A or 4A.

How many cells are in a set of lithium iron phosphate batteries?

The whole set of batteries is 14 strings multiplied by 10 cells = 140 cells.  
Summary: Series and parallel have their own advantages for lithium iron phosphate batteries. Series and parallel lithium battery packs have different methods and achieve different goals.

How many Mah does a 60v battery have?

Your 60V battery will only have 2000 to 2500 mAh. If you want more you will have to connect a number of those series strings in parallel. That's where the \$400 comes from. If you go that route, connect the parallel cells first, then connect the parallel strings in series. if i have 17 cells, wont i have 34 ah ?

?

if i connect in series ?

?

Nope.

What is lithium iron phosphate battery pack?

When lithium iron phosphate battery packs are assembled, different capacities and different voltages are generally realized in parallel or in series. In the lithium battery pack, multiple lithium batteries are connected in series to obtain the required operating voltage.

## Can a 60v lithium battery pack be used in 17 strings

---

### How many strings of 60V lithium battery pack

Generally speaking, 16-17 strings are basically 60 volts. If it is 60 volts and 20 amps, the capacity of a single cell is 2000 mAh, which is 16-17 times 10, 160-170 a cell. It should be clear here ...
