**Can pack batteries be shipped
to Iceland by land now**

Overview

Can You ship a battery across a country?

Many electronic products and devices contain batteries – in particular, lithium batteries, which are commonly found in laptops, smartphones, tablets, medical devices and power tools. There are regulations attached to the cross-border shipping of batteries to ensure they travel safely. These regulations vary depending on the type of batteries.

Is international battery shipping regulated?

If you're handling international battery shipping, it's vital to navigate the complex, strict guidelines enforced by bodies like the International Air Transport Association (IATA) and the United Nations (UN). Battery shipping, especially concerning lithium-ion batteries, is heavily regulated due to its hazardous nature.

Can you take a lithium ion battery overseas?

Most people relocating overseas can avoid all issues by simply not taking these batteries with them and buying new ones upon arrival. However, this easy way out is not afforded to those who want to transport the second main type of battery, a lithium-ion battery.

Can I ship batteries in a shared shipping container?

Similar guidelines apply no matter whether you're shipping batteries within Europe or Worldwide. The following regulations apply when you are relocating possessions, including batteries, in a shipping container. This also includes a shared shipping container – often referred to as groupage.

Can I ship a lithium battery?

As lithium batteries are classified as hazardous or dangerous goods and have been known to cause fires on both ships and aeroplanes, many shipping services (including PSS International) are no longer able to ship them.

However, some courier companies are willing to accept as long as you follow strict guidelines.

Are lithium batteries safe to ship across international borders?

Every single lithium battery shipped across international borders must adhere to rigorous standards. These standards exist not just to meet legal requirements, but also to guarantee your safety and the safety of those handling your shipments. Now, let's talk packaging. Packaging standards for shipping lithium batteries are stringent.
