Overview

Is Georgia a good state to install solar panels?

With higher than average electricity prices and abundant sunshine, Georgia's a pretty great state for solar energy. It may not have the best local solar incentives, but as a Georgian, you can still take advantage of solar's most valuable incentive, the Federal Tax Credit. Here's what you should know about installing solar panels in the Peach State.

Are solar panels a good investment in Georgia?

Solar panel costs in Georgia have dropped by 54% over the past decade. The state offers unique solar incentives, targeting large-scale solar farms. Initial solar investment is substantial, but long-term savings and energy independence are significant benefits.

How much do solar panels cost in Georgia?

Most Georgian households, given the state's warmer climate and consequently higher energy consumption, lean towards a 10-kW system to meet their energy needs. And the average price tag for solar panels in Georgia?

About \$3.74 per watt.

Does Georgia have solar?

Want Solar?

Sunlight is one of Georgia's most abundant resources with an average of 218 sunny days per year. More than 3,000 MW of solar resources, or approximately 12% of our total capacity*, generate significant carbon-free energy for Georgians during sunny, daylight hours.

What is Georgia's solar program?

Georgia's approach is unique. Instead of just zeroing in on residential solar installations, the state is making offers to these solar farms that are hard to pass up. And it's not just about solar. This program embraces all renewable energy projects, casting a wider net for green energy.

Do all solar facilities belong to Georgia Power?

Not all solar facilities you may come across belong to Georgia Power. We have constructed and are operating 16 solar farms and additional demo facilities across the state of Georgia, many in partnership with military installations. The largest, at 128 MW of capacity, is located at Robins Air Force Base in Warner Robins, Georgia.
