Can't the solar panels be moved

Overview

Can I move solar panels from one house to another?

Yes, it is, of course, possible to move solar panels from one house to another. The process, however, is difficult and the cost is high. So, when wondering “Can I take solar panels with me when I move?

”, you should first decide if it is worth doing so.

What happens if you move solar panels outside your service area?

Things get more complicated when you move outside of your solar company’s service area. Since they don’t operate in your new neighborhood, you won’t be able to have them move your solar panels. In that case, you’ll either have to move the solar panels yourself or hire a third party to move them for you.

Should you move solar panels yourself?

Solar panels are notoriously delicate. Not only are the photovoltaic cells sensitive to shocks and vibrations, but the internal wiring is also easy to damage. They need to be handled and shipped with extreme care, or they can be damaged. This is another reason you shouldn’t move the solar panels yourself.

Can solar panels be damaged during a house move?

Solar panels are extremely fragile and contain delicate electrical wiring, so the risk of damaging the photovoltaic modules when removing them, disassembling them, packing them for shipping, and transporting them to another place is very high. If improperly handled, your solar equipment can be completely ruined during your house move.

Can a solar company move my solar system?

If you’re moving within the service area covered by your solar company, you should be able to have them move the solar system for you. Of course, this

won't be free. But you'll have the peace of mind of knowing that the process is being handled by qualified professionals.

How much does it cost to move solar panels?

Here's a more detailed breakdown of the costs: Moving the panels themselves costs between \$4,000 and \$8,000, depending on the size, complexity, and how far you're moving. This includes the cost of removing the panels, packing them safely, shipping them to your new home, and reinstalling them.
