Charging of lithium battery pack with protection

Overview

Always use a charger with overcharge protection. Ensure you use chargers and connectors designed for your specific battery type. Avoid using damaged or incompatible equipment. Regularly inspect your batteries and charging equipment for signs of wear, damage, or corrosion.

Charging of lithium battery pack with protection

BU-409: Charging Lithium-ion

Some Li-ion packs may experience a temperature rise of about 5°C (9°F) when reaching full charge. This could be due to the protection circuit and/or elevated internal resistance. ...
