

SolarMax Energy Systems

Chilean rack-mounted energy storage battery manufacturer

Overview

Are battery energy storage systems a viable alternative for Chilean power producers?

With transmission lines at overcapacity and permitting delays slowing the development of new grid infrastructure, battery energy storage systems (BESS) have surged as a profitable alternative for Chilean power producers.

How much does a battery cost in Chile?

In fact, batteries charged at nearly \$0/MWh during the day in the sunny, northern desert regions of Chile, sell energy at night for over \$100/MWh. Although projects such as Engie's BESS Coya are already enjoying these large spreads, this capacity payment will partially de-risk Chile's dependence on volatile, but still profitable, merchant revenues.

How many energy storage projects are in Chile?

According to a December 2023 publication on the InvestChile website, the country had 23 approved energy storage projects with a total of 3,000 MW of capacity. Chile is exploring a variety of solutions to keep abreast of the changing energy demand landscape ranging from BESS to innovative projects using CO₂.

Will Chile be able to develop energy storage projects in 2024?

In 2022, Chile passed an energy storage and electromobility bill, which made stand-alone storage projects profitable, but the market is still expecting new rules on capacity payment for storage projects, which are to be approved in 2024. Chile has also put in place an auction procedure to award public land for the development of BESS projects.

Will new solar assets in Chile have storage components?

New utility-scale renewable and PMGE assets in Chile (most of which are distributed solar plants smaller than 9 MW) will likely all have storage

components moving forward.

What is a battery energy storage system (BESS)?

This system has a storage capacity of 638 MWh, with 139 MW of installed capacity. This co-located Battery Energy Storage System (BESS) technology uses lithium batteries to store the renewable energy generated by the Coya PV solar plant (180 MWac) based in the Antofagasta Region.

Chilean rack-mounted energy storage battery manufacturer

Solar Battery Manufacturer In China

As a leading solar battery manufacturer in China, we specialize in providing solar energy storage solutions. We have 3 DIP lines, two assembly lines, and ...
