Chilean single lithium battery pack

Overview

What is Chile's new lithium strategy?

On April 20, the Chilean government announced its new lithium strategy, which plans to give control of the country's lithium industry to the state.

Does Chile have a lithium problem?

In this paper, the lithium situation in Chile is examined through this lens, with an exploration of two recent public policies aimed at positively addressing these challenges and an emphasis on the need for active state involvement in these efforts.

Is lithium a critical energy resource in Chile?

The global and regional significance of lithium as a critical energy resource is examined. The evolution of Chile's lithium industry is analyzed, emphasizing two recent key policy initiatives: the 2015 National Lithium Commission report and the newly launched national lithium strategy. The salient features of these initiatives are outlined.

Is lithium a mineral in Chile?

In essence, lithium has a unique status in Chile, similar to hydrocarbons. Under Chilean law, lithium is considered a strategic mineral belonging to the state of Chile, and exploration and operations can only be carried out under special operation contracts (CEOL). 3.2. Companies exploiting lithium in the Salar de Atacama.

Is boric negotiating a lithium deal in Chile?

It's currently negotiating state control over SQM, which has a lithium contract that expires in 2030. In 2019 three companies selected for value-added lithium projects in Chile dropped out of planned investments. Boric is on his first visit to China since being elected in 2021.

Is lithium research in Chile based on basic science?

However, lithium research in Chile is not only focused on technological developments, but examples of basic science are also being conducted, as seen in ref. 58 and 59.
