China-Europe photovoltaic panels greenhouse solar energy

Overview

Are Chinese-manufactured solar panels putting up in European warehouses?

Chinese-manufactured solar photovoltaic (PV) panels are piling up in European warehouses, with Rystad Energy forecasting 100 GWdc of solar capacity in storage by the end of 2023.

Why are Chinese solar panels being shipped to Europe?

Tough tariffs against Chinese imports in the US means that most excess panels are shipped to Europe. Xuyang Dong of Climate Energy Finance, an Australian think-tank, said that "China's estimated wafer, cell and module capacity that will come online in 2024 is sufficient to meet annual global demand now through to 2032.

Where do European solar panels come from?

The vast majority of those panels and parts came from China – in some cases, 95%, International Energy Agency data show. Yet the green energy boom hasn't helped Europe's few local solar panel manufacturers, which have hit crisis point, crushed by cheaper imports and oversupply.

Are cheap Chinese solar panels driving record solar energy installations?

A flood of cheap Chinese solar panel imports is driving record solar energy installations. But those same imports are crushing Europe's few local solar manufacturers. Governments and industry are split over how to respond. The Reuters Power Up newsletter provides everything you need to know about the global energy industry. [Sign up here.](#)

Is Europe playing catch up with China's solar industry?

With some Chinese solar firms able to sell even below production costs, Europe is playing catch up. "The solar industry in China has been strategically subsidised with hundreds of billions of dollars for years," Erfurt told Reuters. (\$1 = 0.9310 euros) Reporting by Kate Abnett and Nina Chestney.

When will European Solar supply chain leaders buy European solar panels?

Although efforts are underway to build a reliable solar supply chain in Europe, the need for panels now means leaders cannot wait until 2025 or later to buy European. Marius Mordal Bakke, senior supply chain analyst, Rystad Energy
