

## SolarMax Energy Systems

# Combination of energy storage power station and wind power

## Overview

---

Co-locating energy storage with a wind power plant allows the uncertain, time-varying electric power output from wind turbines to be smoothed out, enabling reliable, dispatchable energy for local loads to the local microgrid or the larger grid.

## Combination of energy storage power station and wind power

---

### Energy storage system based on hybrid wind and photovoltaic

A 6 kWp solar-wind hybrid system installed on the roof of an educational building is studied and optimized using HOMER (Hybrid Optimization of Multiple Energy Resources) ...

#### Efficient Higher Revenue

#### Intelligent Simple O&M

#### Flexible Abundant Configuration

- Max. Efficiency 97.5%
- Max. PV Input Voltage 600V
- 150W Peak Output Power
- 2 MPPT Trackers, 100% DC Input Overvoltage
- Max. PV Input Current 15A, Compatible with High Power Modules
- IP66 Protection Degree: support outdoor installation
- Smart I-V Curve Diagnosis Function: locates PV string faults accurately and automatically detect faults
- DC & AC Type II SPD: prevent lightning damage
- Battery Reverse Connection Protection
- Plug & Play, EPS Switching Under 30ms
- Compatible with Lead-acid and Lithium Batteries
- Max. 6 Units Inverters Parallel
- AFD Function (Optional): when an arc fault is detected the inverter immediately stops operation

## Multi-method combination site selection of pumped storage power station

Energy internet (EI) is the framework foundation for tackling climate change and environmental issues and achieving "carbon peak and carbon neutral". In this paper, ...
