

SolarMax Energy Systems

Construction of a centralized energy storage project in Zimbabwe

Overview

Will Zimbabwe end power shortages and load shedding by 2030?

The Zimbabwe Electricity Supply Authority (ZESA) has unveiled ambitious plans to end the country's power shortages and load shedding by 2030. With projects generating 3,000MW currently underway, ZESA says it aims to provide universal access to electricity and eliminate load shedding altogether.

Is Zimbabwe a future energy exporter?

With this ambitious roadmap, ZESA is positioning Zimbabwe as a future energy exporter while addressing domestic power needs. However, the success of these plans hinges on navigating complex financial and logistical challenges. ZESA has unveiled ambitious plans to end the country's power shortages and load shedding woes by 2030.

What projects are coming to Hwange?

Dr Gata shared updates on several key projects: The Zhong Jin Heli project, expected to produce 300MW in Hwange, began in November and will be completed by March next year. The Titan Project, a 720MW coal-fired plant also in Hwange, will deliver power by December next year.
