Containerized Energy Storage Stack

Overview

When will the Tener stack energy storage system be available?

The TENER Stack energy storage system is slotted for mass production at CATL ESS Europe in 2025. Add Electrek to your Google News feed. FTC: We use income earning auto affiliate links.

Can Tener stack save energy?

Deploying 800 MWh of storage capacity via Tener Stack requires nearly one-third fewer containers than a conventional 6 MWh system. Additionally, land use efficiency can be increased by 40 percent, with an overall savings of 20 percent in power plant construction costs, according to CATL.

What is CATL's new energy storage system?

This is CATL's new move in the energy storage space after the April 2024 release of Tener, an energy storage system with zero degradation for five years. Tener is a standard 20-foot containerized energy storage system with a total capacity of 6.25 MWh, the highest energy in the world at the time.

How many EVs can a tener stack charge?

Today, the company unveiled a 20-foot-tall energy storage system (ESS) called the TENER Stack, which, according to CATL, offers breakthroughs in storage capacity, deployment flexibility, safety, and transportation efficiency. It also has the energy storage capabilities to charge 150 EVs.

Is CATL Tener energy storage a Bess system?

"CATL has always been at the forefront of the energy transition," said Amanda Xu, CTO ESS & President of ESS Europe CATL. "To meet the expectation of a BESS system that has high energy density, small footprint, simpler AC-side configuration, and flexible deployment, we bring the latest CATL TENER energy storage solution.

What is CATL TENER energy storage?

Per Amanda Xu, CTO ESS & President of ESS Europe CATL: CATL has always been at the forefront of the energy transition. To meet the expectation of a BESS system that has high energy density, small footprint, simpler AC-side configuration, and flexible deployment, we bring the latest CATL TENER energy storage solution.
