

**SolarMax Energy Systems**

# **Cyprus Energy's outdoor power supply**

## Overview

---

What type of energy is used in Cyprus?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass – the burning of charcoal, crop waste, and other organic matter – is not included. This can be an important energy source in lower-income settings. Cyprus: How much of the country's energy comes from nuclear power?

How can I connect to the electricity supply in Cyprus?

Connecting to the electricity supply in Cyprus involves a visit to the nearest Electricity Authority customer service centre. The Electricity Authority of Cyprus (EAC) are the only power supply company on the island. The EAC website has information in English on domestic account details, metre reading, bill paying and more.

Is biomass a source of electricity in Cyprus?

Traditional biomass – the burning of charcoal, crop waste, and other organic matter – is not included. This can be an important source in lower-income settings. Cyprus: How much of the country's electricity comes from nuclear power?

Nuclear power – alongside renewables – is a low-carbon source of electricity.

What is Cyprus grid?

Cyprus Grid provides comprehensive insights into the real-time and historical electricity generation data of Cyprus. Whether you're tracking renewable energy contributions or examining generation curtailments, we offer the data you need to stay informed about Cyprus's energy landscape.
