

SolarMax Energy Systems

Democratic Congo communication base station power supply policy

Overview

• : • : 18.0 million (1997). • : • : 6.5 million (1997).

How many radio stations are there in Congo?

There were 20 radio stations in the Democratic Republic of the Congo as of 1999. Radio is the dominant medium, with a handful of stations, including state-run Radio-Télévision Nationale Congolaise (RTNC), broadcasting across the country.

What is the power sector in DR Congo?

Revised in September 2023, this map provides a detailed view of the power sector in DR Congo. The locations of power generation facilities that are operating, under construction or planned are shown by type – including liquid fuels, natural gas, coal, hybrid, hydroelectricity, solar PV and methane.

How much electricity does the DRC have?

1 No more than 17 percent of the DRC's population has access to electricity according to household surveys reviewed for the 2019 Tracking SDG7 report, while oficial government statistics place that rate at 9 percent.

Who was not informed about RTNC interference in Congo?

Radio-Télévision Nationale Congolaise (RTNC), the state-run national broadcaster, was interfering in Congo. The then Telecommunications Minister Thomas Luhaka was not informed of such interference by the government.

Does the DRC have a 5G network?

The DRC has not yet reached 5G and is still developing its 3G/4G network. The low penetration rate leaves plenty of potential for development of higher-speed networks and linking the DRC to submarine cables linked to Europe.

What will the DRC do in 2050?

By 2050, the goal is to have more than 50 percent of households using fiber

optics and more than 90 percent able to connect to the internet via mobile phone. The DRC will have to develop its robotics market (digital technology) and become an important market for phones, software, video games and 3D technology.
