Does Belgium provide subsidies for energy storage projects

Overview

How much subsidy does Flemish agricultural investment fund (vlif) offer?

For small and medium-sized enterprises (SMEs), the net subsidy can even reach 30%, while large companies can still benefit from a support rate of 15%. Flemish Agricultural Investment Fund (VLIF): Farmers and horticultural companies can receive up to 40% subsidy for sustainable productive investments, including investments in green energy storage.

How will I4b benefit Belgian households?

Commenting on the project, Andre Autrand, CEO of I4B said: "It addresses fundamental challenges related to the security of the electricity supply, balancing the grid, renewable energy development and decarbonization – all of which will benefit Belgian households as well as the industry and economy in general."

How does Flanders support green energy storage?

Discover the support for green energy storage in Flanders. With various programs, such as VLIF and EP+, companies can receive up to 40% subsidy for investments in battery storage systems. The Increased Investment Deduction and other tax incentives offer additional benefits for investors.

What subsidies does EP+ offer?

With a focus on sustainability, EP+ offers subsidies for a wide range of initiatives, including the installation of batteries for energy storage (Technology number 201099). These subsidies can cover a significant part of the additional cost of the investment, with support percentages ranging from 15% to 30%.

Will state aid be available for large-scale electricity storage systems?

In autumn 2024 two draft regulations were published regarding state aid for large-scale electricity storage systems (BESS), one from the Modernisation

Fund ("MF ") 1 - and the second under the National Recovery and Resilience Plan ("RRP ") 2.

Does the TSO (Elia transmission Belgium) have a bankable business model?

Since 2016, the TSO (Elia Transmission Belgium) is not even buying ancillary services with contracts longer than one year and even at one year, it's not sufficient to build up a bankable business model. What we've seen is two types of project development: one is more balance sheet-based, people buying an asset and taking the risk.
