Does Jordan Telecom have many photovoltaic sites

Overview

How many solar PV projects are there in Jordan?

Jordan Electric Power Company (JEPCO): 591.44 MW (32,257 projects). Irbid Distribution Company (IDECO): 309.32 MW (28,588 projects). Electricity Distribution Company (EDCO): 181.10 MW (13,300 projects). The global decline in solar PV system prices fueled strong demand for installations during the first half of 2024.

Is there a cap on solar PV projects in Jordan?

In September 2024, Jordan's Council of Ministers lifted the cap on solar PV project sizes, enabling large-scale installations. A notable example is a 50 MW solar power plant financed by Cairo Amman Bank and currently under construction.

Why does Jordan need a solar PV installation & maintenance service?

Since Jordan started the solar PV installation in 2012, the demand for solar PV operation and maintenance (O&M) services increased, driven by aging systems requiring inverter replacements (every 8-10 years) and system optimization.

What did Jordan do in 2024?

In 2024, Jordan made significant advancements in its solar photovoltaic (PV) sector, reflecting its commitment to expanding renewable energy and achieving greater energy independence. Below is an overview of the key developments and milestones:

What are the new connection mechanisms for on-grid solar PV systems?

New connection mechanisms were introduced under Bylaw (58), year 2024, enabling four distinct connection mechanisms for on-grid solar PV systems. Electricity consumers below 300 kWh/month can install systems under the "Buy All-Sell All" mechanism without grid fees.
