EMS Building for Ireland Telecommunications Base Station

Overview

Why are base station towers important in Ireland?

The rapid expansion of mobile telephone services in Ireland has required the construction of base station towers in urban and rural areas across the country. These base station towers are an essential feature of all modern telecommunications networks.

How do base stations work in Ireland?

The base stations are connected by means of leased lines, radio, optic fibre, coaxial cable, etc. to an exchange system which allows communications into the fixed network or onwards to other mobile phone users. At present there are two systems in operation in Ireland – analogue and digital.

How much power does a base station have in Ireland?

In contrast the highest field strengths measured in the vicinity of base station towers in Ireland range from 0.00003 watts per square metre to 0.0035 watts per square metre, according to measurements made by Forbairt at a number of locations.

What is effective telecommunications tower site selection?

Effective Telecommunications tower site selection is key to successful network architecture and design. Our national tower network offers strategic urban and rural locations to support network expansion and technology rollout for mobile and wireless communications operators.

How many antennae are on a Telecom Eireann & Esat Digifone antennae support structure?

In the case of an antennae support structure shared by Telecom Eireann and Esat Digifone and fully equipped (3 sectors), there would be a total of twenty one antennae mounted on the structure, excluding additional antennae for point to point radio links.

Are base station towers a hazard to health?

These base station towers are an essential feature of all modern telecommunications networks. They facilitate calls between mobile phone users and enable users of conventional telephones to place and receive calls from portable units. Concern has been expressed that the radio signals from these base station towers may be a hazard to health.
