

SolarMax Energy Systems

EU Solar PV Project

Overview

What does Solarpower Europe do?

SolarPower Europe is responsible for communications, while supporting market analysis and policy activities, in this three-year Horizon Europe funded project, which will aim to: offer sustainable solutions for handling end-of-life solar PV panels in the EU; and optimise solar PV recycling techniques. Questions?

Get in touch.

What is the European solar PV Alliance?

The European Solar PV Alliance is a network contributing to building resilience and strategic autonomy for Europe's solar PV value chain.

How does the EU support the European solar PV manufacturing sector?

Over the last years, the EU has taken initiatives to strengthen its support to the European solar PV manufacturing sector, which includes several globally competitive companies in several steps of the value chain.

What is the EU Solar Strategy?

To deliver the EU Solar Strategy objectives, the alliance will re-develop, de-risk and accelerate the PV industry in Europe across all segments of the value chain to create its competitive position in the context of booming demand for solar PV in Europe and globally.

What does the EU Solar Alliance do?

The alliance aims to accelerate solar PV deployment in the EU by scaling-up to 30 GW of annual solar PV manufacturing capacity in Europe by 2025, facilitating investment, de-risking sector acceleration, and supporting Europe's decarbonisation targets.

How many solar PV projects have been awarded funding in 2023?

In November 2023, 8 solar PV projects with a total capacity of 282.77 MW were awarded funding and invited by the European Climate, Infrastructure and Environment Executive Agency (CINEA) to prepare a grant agreement and commence their project within 24 months following the grant signature.
