East Asian Solar Panels

Overview

Why are Chinese solar panels booming in Southeast Asia?

Chinese-owned solar manufacturing facilities have popped up across Southeast Asia as companies sought to navigate U.S.-China trade frictions. While Cambodia is still primarily an agrarian economy, solar panels were the Southeast Asian country's top export to the U.S. last year, according to data from consultancy Oxford Economics.

Why are solar panels uncompetitive in Southeast Asia?

The American Alliance for Solar Manufacturing Trade Committee also argued that Southeast Asian companies received an unfair level of subsidies, making U.S.-made solar panels uncompetitive. Chinese-owned solar manufacturing facilities have popped up across Southeast Asia as companies sought to navigate U.S.-China trade frictions.

Why are US tariffs on solar panels coming to Southeast Asia?

The U.S. government has announced a new tranche of tariffs on solar panel imports from four Southeast Asian nations, in response to complaints from U.S. manufacturers that companies based in the countries are flooding the market with unfairly cheap goods.

Are Chinese solar panels making US solar panels non-competitive?

The committee has accused major Chinese solar panel manufacturers with facilities in Malaysia, Cambodia, Thailand and Vietnam of selling panels below production costs and receiving unjust subsidies, rendering US products non-competitive.

Are solar imports from Southeast Asia unfairly benefiting from government aid?

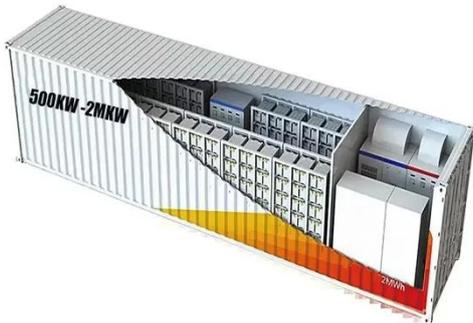

Accepting the Committee's claim that solar imports from Southeast Asia are unfairly benefiting from government aid, the Department then announced anti-

subsidy countervailing duties on all solar imports from the four Southeast Asian nations.

Where are solar panels made?

Most solar panels installed in the US are currently made abroad, and around 80% of those imported solar panels are made in Malaysia, Vietnam, Thailand, and Cambodia.
