East Timor Communication Base Station Wind Power Construction Project

Overview

What is East Timor electrification masterplan 2025?

The overall objective of this project is to develop, for the Government of East Timor, the Electrification Masterplan 2025 of East Timor based on Renewables Energies. The East Timor Renewable Energy Electrification Plan consists on the thorough analysis of wind, solar and hydro resources (including wind measurement stations installation).

Did East Timor have a wind station?

During 1992–1995 four masts in East Timor collected surface wind data for the Indonesian Meteorological Institute. The sites were all coastal: Dili, Baucau, Comoro, and Oecussi. Maximum mean wind speed at 24 meters was 4.3 meters/second. Neither the stations nor records appear to have survived.

Does Timor-Leste have a 20-year power sector development plan?

This study report presents the results of a 20-year power sector development plan for Timor-Leste (East Timor).

Is wind power economic in West Timor-Leste?

A USAID-funded wind project has been on going in the “NTT Province” of Indonesia that also includes West Timor. Based on West Timor data, this study concludes that wind power is probably not economic in coastal areas, but it may prove to be economic in the uplands and mountains of Timor-Leste both for grid connected and off-grid applications.

Where will a 50MW wind power project be implemented in Timor-Leste?

The head of the International Finance Corporation (IFC) in Timor-Leste, David Freedman said that according to the report of Scaling Wind Phase, Lariguto is the chosen location for the implementation of the 50MW wind power project.

What is the 'one port' project in East Timor?

Equally significant is the "One Port" project. The Tiba Port project, constructed by China Harbour, is located 10 kilometers west of the capital Dili. The main body of the port is a 630-meter-long dock, including a 7000 TEU berth and a 3500 TEU berth. It is the first modern international container freight terminal in East Timor's history.

East Timor Communication Base Station Wind Power Construction P

- ✓ 100KW/174KWh
- ✓ Parallel up-to 3sets
- ✓ IP Grade 54
- ✓ EMS AND BMS

Timor-Leste - Asia Wind Energy Association

Another project in study, which may be fundamental to attract potential investors, is the construction of a national laboratory for the research of renewable energy potential in the country.
